ASSIGNMENT 1

MERANTI INTERACTIVE COMPANY PROFILE

PREPARED BY:

NO.	NAME	STUDENT ID	GROUP
1.	FARZANATUL HAZIERAH HAJIDAH ABU HANIFAH	2024419062	LG2404A
2.	NUR AINA ZULAIKHA ZAKI	2024425896	LG2404A
3.	FATIN BATRISYIA SHAHRI RAMADHAN	2024252064	LG2404A

PREPARED FOR:

MADAM JENNETA BINTI IBRAHIM

SUBMISSION DATE: 14 MAY 2026

1.0 Company Overview

Meranti Interactive is an entertainment firm that specialises in designing video games. For this purpose, the firm provides game production services to designers all over the world. To capitalize on its technological prowess and creativity, the firm not only designs its own concepts but also collaborates with other firms all around the globe. As part of efforts to provide gamers with an enhanced experience, the firm is developing its own gaming controller.

Vision: To establish ourselves as a game company that will set standards in excellence in co-development and interactivity within the digital entertainment industry.

Mission: To produce good games through collaboration with companies throughout the world in developing our gaming industry.

Core Values:

- **Creative Quality:** We create aesthetically pleasing games, which are fun to play while incorporating creative concepts and detailed designs to make the experience entertaining for the gamer.
- **Innovation:** We value advanced technology as they make it easier to develop our ideas becoming realistic.
- **Teamwork:** We value our teamwork. When we collaborate, we get things done smoothly, reach our goals and have project outcomes.
- **Reliability:** Our clients can rely on us because we focus on being consistent in our work and giving only great quality services.

2.0 Products and services

a. Original Game Development

We design our video games as proprietary IP games where we create action RPGs with great storylines and action, as well as simulations with strategic and construction features.

b. Co-Development Services

We offer our services to help other game developers with 3D modelling, animations, and optimising their games' performance.

c. Hardware Development

We have ventured into hardware through the M.A.P. Controller, which is created to make gamers comfortable during long hours of gameplay.

3.0 Target markets

a. Business Clients (B2B)

The companies we deal with are the game developers who originate from another country. The game developers create games that are very complex in nature. More help is needed for them to be able to meet their deadlines and maintain quality.

Assist in:

- Creating games
- Creation of 3D models (characters, environments)
- Upgrading the technical side and optimising

b. Game Players (B2C)

I. Simulation gamers (age 18-35 years):

- Enjoy games where they can think in advance and plan
- Games involving the creation and management of resources

II. RPG gamers (16–40 years old):

- Games with some storyline and action involved
- They like character creation, discovery of new places, and getting immersed in the game's world

4.0 Competitive Analysis

Main competitors:

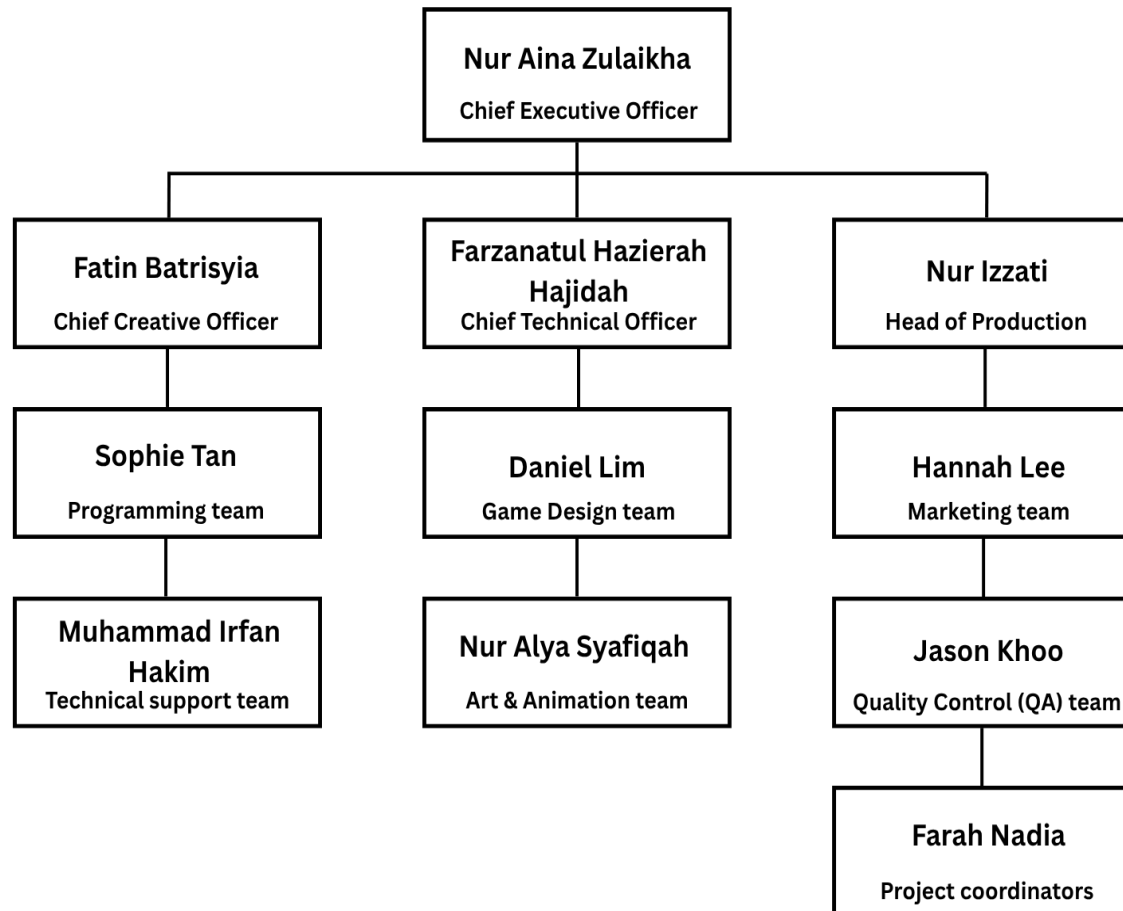

- Passion Republics (Malaysia)
- Lemon Sky Studios (Malaysia)
- Global Studios like CD Projects

Our Strengths:

- Balance Between Creativity & Technical Abilities:** We provide our design and technical abilities in making games which will be fun and professionally made.
- Low-Cost & High-Quality Solutions:** We provide our services at lower costs than other international studios.
- Expanding beyond Software:** Our expertise does not stop at software creation; we are currently developing the M.A.P. Controller.

5.0 Management teams

The Meranti Interactive management comprises a group of skilled professionals specialising in fields such as video game development, programming, and art/animation.

6.0 Financial Overview

Generates income from:	Expenses include:	Revenue is reinvested in:
- Game Sales - Co-development - Other services like developing 3D assets and animations	- Salaries - License for software - Infrastructure costs - Marketing costs - Research and Development costs	- Development of more games - Enhancing production quality - Business growth

7.0 Key clients and projects

a. Original Games:

- *Project Gaharu: Empire of Trade* – A 2D simulation game focused on management and automation
- *Hikayat: Blades of Nusantara* – A 3D action RPG inspired by Southeast Asian culture and martial arts

b. Co-Development Work:

- **“Mythos Reborn”** – Mythology Adventure Game

Partner Studio: *Ubisoft* (France)

Role: Cultural research support, 3D asset creation, and storytelling visuals

Project Overview: A narrative-driven adventure game that is inspired by the myths of cultures around the world. Our team helped with environmental designs to maintain consistency of visuals among various regions based on mythology.

- **“Neon Circuit”** – Cyber Racing Game

Partner Studio: *Passion Republic Games* (Malaysia)

Role: Vehicle design, visual effects, and performance optimisation

Project Overview: A speedy futuristic racing game set in colourful cities. We were involved in the design of vehicles and motion effects for the game.

8.0 Awards and recognition

I. “Rising Game Development Studio of the Year (Southeast Asia)”

- Honoured with a commendation due to our contributions to the regional gaming industry through the development of original games, as well as the co-development of games.

9.0 Demographics

Category	Details
Total Workforce	80–120 employees
Age Range	22–50 years old
Experience Mix	Includes fresh graduates, mid-level professionals, and senior specialists
Gender Distribution	Approximately 55% female, 45% male
Main Departments	Game Design, Programming, Art & Animation, Marketing, Production, Quality Control
Workplace Diversity	Inclusive hiring practices with equal opportunities and diverse skill backgrounds

10.0 Corporate social responsibility (CSR)

I. “Green Pixel Initiative” (Environmental Program)

A yearly tree-planting activity together with local nongovernmental organisations centred on the planting of Meranti trees and environmental education. Employees are also encouraged to engage in volunteer work.

II. “Level Up Academy” (Educational Program)

A training program designed for college students, providing mentorship in game creation, three-dimensional modelling, coding, and technical writing. Some of the selected trainees will be given an opportunity to become interns at the company.

III. “Future Creators Internship Program” (Talent Development Initiative)

An internship program tailored for students and recent graduates, allowing them to work and learn about game development in various departments of the company.
